## Price Increase Notice AUGUST 2016

# FSW BULLETIN

As a result of the decline of Sterling against the Euro & Dollar we have no choice but to implement price increases effective from 1st August 2016.

We will continue to monitor the situation closely and will advise further changes as other products become affected by the currency movements.

Since the 23rd June the LME rate for copper has increased by 19%, therefore, we have no alternative but to apply the increase to our selling prices.
